Profile Summary
Motivated MCA student at Kristu Jayanti University, Aspiring IT & Cybersecurity professional focused on networking, cloud security, and ethical hacking. Quick learner, strong team player with solid communication and problem-solving skills. Eager to grow and contribute through hands-on projects.

Education			
Qualification	Institute	Year	Percentage
MCA	Kristu Jayanti (Deemed to be University)	2025 - 2027	67%
BCA	CMR University	2022 - 2025	74%
Class XII (Commerce)	Kendriya Vidyalaya School	2022	62%
Class X	Lake Montfort School	2020	60%

Internship Experience			
Cellcom Solutions Limited		Intern	JUNE 2024 – AUG 2024
Roles and Responsibilities	- Developed a Student Management System using Python and Django. - Integrated MSSQL database for structured data handling and management. - Designed and tested backend modules using VS Code. - Improved data organization and system workflow through structured application and database development.		
Edgenius Skillfied Mentor pvt.Ltd		Intern	MAY 2026 – JULY 2026
Roles and Responsibilities	- Developed a Python-based Signature Antivirus for malware detection using file-hash comparison. - Built a Packet Sniffer and ARP Spoofing Detector using Python and Scapy for network monitoring and analysis. - Created an Encryption and Decryption Tool using Python cryptography for secure data protection. - Applied Python, networking, and Cyber Security concepts to develop and test technical solutions involving file security, network analysis, and data protection.		

Position Of Responsibility	
- Event Head – Scientific Exploration, Kristu Jayanti Institute of Technology (KJIT) - Media Team Member – Kristu Jayanti Institute of Technology (KJIT) - Student Volunteer - ICCTAC 2026, Kristu Jayanti Institute of Technology (KJIT)	- Project Team Lead - Media Team Management System (ECP), Kristu Jayanti Institute of Technology (KJIT) - Project Team Lead – Academic Project

Extra Curricular Achievements	
Certifications	• Cloud Computing – NPTEL (2024) • Cisco Certified Support Technician – CISCO (2025) • Ethical Hacking Essentials – EC-Council (2026) • Fundamentals of JAVA – Infosys Springboard, 2025 • Cynux Cybersecurity CS-100 – Cynux Era (2025) • Artificial Intelligence – Udemy (2024) • Cyber Security – Udemy (2023) • Ethical Hacking – Udemy (2023)

Achievements and Participation's	• Secured First Place in the Surprise Event Competition at Manoeuvre – College Fest. • Participated in National Workshop On CRACKING THE CODE: A Hands-on Journey into Cyber Security and Ethical Hacking • Participated in Global Webinar conducted by EC-Council on Trust is the Attack Surface: Injection Attack in Multi-Agent AI Systems
Social Initiative/ Volunteering	• Volunteered at GUANELLA PREETHI NIVAS TRUST. Guanellian mission is directed to evangelize the poor, to reveal the love of the Father, to spread charity, and to assist with works of mercy for the poor of the gospel, especially the underprivileged children, the aged, and the mentally handicapped. • Volunteered at Orphanage Outreach Programs , Served Childern through Community Service Activities.
Projects	• Media Team Management System – ECP, Kristu Jayanti Institute of Technology (KJIT) : Project Team Lead for an academic system designed to streamline media-team operations, including event registration, task assignment, approval workflows, media tracking, and report generation. • Gas Leakage Detection System – BCA Final Year IoT Project, CMR University : Developed an IoT-based gas leakage detection system using gas sensors, microcontrollers, LCD display, buzzer, and alert mechanisms for real-time gas monitoring and safety notifications. • Smart Blind Stick – BCA Academic IoT Project, CMR University : Developed an IoT-based assistive device using sensors to detect obstacles and provide real-time alerts, designed to improve mobility and navigation for visually impaired individuals. • Student Management System – Internship Project, Cellcomm Solutions Limited : Developed a Python/Django-based student management system with MSSQL integration, supporting structured student records, course management, enrollment, attendance, grades, and data-driven application workflows. • Hostel Management System – Academic Project, Kristu Jayanti Institute of Technology (KJIT) : Developed a Django-based hostel management system covering student allocation, room management, fees, attendance, staff, maintenance, visitors, inventory, notifications, and administrative workflows. • Library Management System – Mini Project, CMR University : Developed a library management application to manage books, student/member records, book issue and return transactions, availability tracking, and basic library administration workflows. • Signature Antivirus for Malware Detection – Internship Project, Edgenius Skillfied Mentor : Developed a signature-based antivirus solution for identifying known malware by analyzing files against predefined malware signatures and implementing basic detection and security mechanisms.

	• Packet Sniffer and ARP Spoofing Detector – Internship Project, Edgenius Skillfied Mentor : Developed a network security tool for capturing and analyzing network packets and detecting potential ARP spoofing activities to identify suspicious network communication. • Encryption and Decryption Tool – Internship Project, Edgenius Skillfied Mentor : Developed a security utility for encrypting and decrypting data using cryptographic techniques, focusing on secure data handling and demonstrating fundamental concepts of information security. • Personal Portfolio – Web Project : Developed a personal portfolio website to showcase academic projects, technical skills, internships, achievements, and professional experience through a responsive web interface. Additional Information	
Languages Known	English (Proficient), Malayalam (Proficient), Hindi (Proficient), Kannada (Beginner)
Technical Proficiency	Programming & Development: Python, Django, HTML, CSS, React Database & Data: SQL, MSSQL, DBMS IoT & Hardware: IoT, Arduino IDE Networking & Cloud: Networking, Cloud Computing Tools: VS Code
Soft Skills	Structured Problem Solving, Logical Reasoning, Time Management, Team Collaboration, Project Coordination, Communication, Technical Planning
